

Major Canadian Natural Gas Producer Expands AnyWhere/AnyTime Services from Industrial Evolution to Over 100 Wells

Services extends ability of engineers and operators to access gas well production data in real-time from any Internet-connected PC

EDMONTON, ALBERTA, CANADA, September 3, 2001— Industrial Evolution today announced that it has been awarded a contract from one of the largest oil and gas companies operating in Canada to expand the scope of its AnyWhere/AnyTime services to cover over 100 wells.

Following the success of an initial project completed in March 2001, users have shown their appreciation of the technologies and services provided by industrial Evolution by asking for the service to be extended to cover all wells in the same region.

For this company, the ASP-model has worked well, getting the right information to the right people wherever they are, faster than would have been accomplished in-house and at lower cost of ownership.

For more information contact your local Industrial Evolution representative for additional information.

About Industrial Evolution

Industrial Evolution is the first company with its roots firmly planted in the process industries to bring a new collaborative approach to plant operations using the Internet. Industrial Evolution's AnyWhere™ and AnyTime™ services allow industrial customers to share operational data and production information with their customers, suppliers and outside experts via the Web, securely, and where and when needed.

Industrial Evolution is headquartered in Phoenix, Arizona, and also has operations in Edmonton, Alberta Canada. Additional information is available on the Internet at www.industrialevolution.com or call Simon Wright on +1 (602) 867-0416.
