

PSE Chooses Industrial Evolution's Power*Share™ Service to Receive Data from PPL's Colstrip Power Plant

Colstrip Power Plant to Share Real-Time Data Feed with PSE

PHOENIX, ARIZONA, December 1, 2008 — Industrial Evolution is pleased to announce today that Puget Sound Energy (PSE) of Bellevue, Washington, has chosen Industrial Evolution's Power*Share service as a means of receiving operating data from its JV partner, Philadelphia Power and Light (PPL).

PPL operates four coal-fired generating units capable of producing over 2 gigawatts of electricity at its Colstrip power plant, east of Billings, Montana. PSE is co-owner of two of the generating units.

Power*Share is a service provided by Industrial Evolution, whereby real-time operating data from PPL's real-time historian (in this case, "PI" from OSIsoft) stored in a database behind the PPL firewall is replicated in Industrial Evolution's own data center from where it is managed and served to PSE's historian (also a PI System), located behind PSE's corporate firewall. Web*Technician handles all the differences in security, formatting, resolution, frequency, etc. between the 2 partners as well as providing a supported interface between the 2 organizations.

"PSE was familiar with Industrial Evolution as an existing user of our Power*Share service," remarked Simon Wright, CEO of Industrial Evolution, "So when they needed to receive data from PPL's Colstrip plant, Power*Share was a natural choice"

Through use of Power*Share, PSE is better able to plan power production and availability, and therefore can better develop its trading strategies.

"Industrial Evolution is very pleased that its service to PSE in the past, has resulted in PSE deciding to buy the Power*Share service for themselves" added Mr. Wright. "We are delighted to have been chosen by PSE for this application."

About Industrial Evolution

Industrial Evolution specializes in Data Services that capture, store, transform, exchange and present real-time process data. Large process companies are increasingly forming collaborative partnerships with their suppliers, customers and even competitors, focused on improvement in operating performance, reduction of inventory, increase in supply chain efficiency and optimization of logistics. Our service are tailored to the non-operating partner's need for real-time data from an operation in which it has an economic interest

Industrial Evolution is headquartered in Phoenix, Arizona, and also has operations in Edmonton, Alberta Canada. Additional information is available on the Internet at www.industrialevolution.com or call Simon Wright on +1 (602) 867-0416.

About PSE

Washington state's oldest and largest energy utility, with a 6,000-square-mile service area stretching across 11 counties, Puget Sound Energy serves more than 1 million electric customers and nearly 750,000 natural gas customers. PSE, a subsidiary of Puget Energy, meets the energy needs of its growing customer base primarily in Western Washington through incremental, cost-effective energy conservation, procurement of sustainable energy resources, and far-sighted investment in the energy-delivery infrastructure. PSE employees are dedicated to providing great customer service to deliver energy that is safe, reliable, reasonably priced, and environmentally responsible.
